

# Title:Phoenix

What do we leave our children

What future remains

(Intro)

Remember your mistakes and pain,

The lessons learned

are worth the price paid.

Knowledge gained from love and loss —

We have fallen, but still remain.

(Chorus 1)

Like a phoenix, we can rise from the ashes,

Rebuild the world from the damage we have

dobe done.

What will we leave our children?

What future can we conceive?

What future will they believe?

(Verse 1)

We're all unique, yet all the same,

We starved to feed the rich, we played their  
game.

We've seen the fire, we know the pain,  
But through the loss, something remains.

(Chorus 2)

We can rise like a phoenix,  
Turn the darkness into light.

From broken chains, we finally start,  
A spark of hope within the night.

(Bridge)

The past is gone, but not in vain —  
Its echoes whisper through the flame.  
We'll find the strength to never cease,  
Our quest for truth, our dream of peace.

(Final Verse / Outro)

What will we leave our children?

Will they curse our name or sing our praise?

If tomorrow's built on what we do,

Then let compassion make us strong.

What will we leave our children

What future remains
